Summary

Full-Stack Software Developer with 4+ years of experience, focused on the React.js, Next.js, TypeScript, and C# (.NET) ecosystem. Experienced in building scalable user interfaces, prototyping layouts in Figma, geospatial data visualization, and REST API integration. Committed to code quality and maintainability, leveraging AI-assisted development tools such as Claude and Cursor to streamline development workflows and accelerate technical delivery.

Experience

Sysdam (by Pimenta de Ávila) | B2B SaaS for Dam Safety & Monitoring Nova Lima - Hybrid
Full Stack Developer 05/2024 - Present

- Led and developed the Digital Twin module, integrating different system modules into a geospatial visualization using CesiumJS for real-time dam monitoring and tracking.
- Develop scalable interfaces and reusable components with React.js and Ant Design (AntD), using Context API for global state management and Axios for RESTful API integration.
- Refactored the application's architecture and design patterns, reducing support requests by 55%, while also contributing to back-end development with C#.
- Contributed to the evolution of the application architecture by structuring reusable components and applying design patterns to improve code maintainability.

dti digital (WPP Group) | Global Agile Software & Digital Transformation Agency Remote
Software Development Intern 06/2022 - 05/2024

- Developed front-end interfaces and features for web systems in the banking and travel sectors using React.js and Material UI (MUI).
- Integrated applications with RESTful APIs using Axios and Redux, also making targeted adjustments to endpoints and MySQL databases to meet front-end requirements.
- Implemented automated tests with Cypress and worked in an Agile environment, participating in refinements and facilitating team ceremonies.
- Facilitated Agile ceremonies and participated in refinements, contributing to the team's planning and delivery tracking.

Skills

- **Languages:** JavaScript (ES6+), TypeScript, C#
- **Front-end:** React.js (Hooks, Context API), Next.js, Vite, Ant Design, Material UI, Styled-components, Tailwind CSS, CSS3
- **Back-end & Data:** .NET, REST APIs, MySQL
- **Tools:** Git, GitHub, Azure, Figma, Cypress, NPM, Yarn, Claude, Cursor
- **Languages:** Portuguese (Native), English (Intermediate)

Education

Estácio de Sá *Jan 2023 - Present (Expected Dec 2026)*
Bachelor's Degree in Information Systems
